About Us

We are a relatively new family operation, with several years experience.

We have owned our organic farm for 10 years; we have always loved animals, taking care of our way to live and environment by consuming natural healthy products.

Our belief is to help promote a better way of life on and around the farm by natural growth for all our livestock, and gardens.

The food we eat should not have to travel for thousands of miles for us to consume, we need to reduce our reliance on foreign produced foods. Most of what we pay for food that is shipped is for transportation. The flavor is lost in the aging, packaging and preservatives that are added to keep the produce looking fresh.

Organic products are fresh: no chemicals added for pest or weed controls, the seeds to grow our produce do not have any growth hormone added to the casings.

Shani's Farm offers certified organic produce, as well as free range poultry (chicken, eggs and turkey), pork and lamb along with organic hay.

We raise heritage breed animals, Berkshire swine, Jacob sheep, along with cross bred meat sheep, various heritage poultry. All fed chemical free feed along with organic pasture grasses, organic hay.

What is a CSA?

Community Shared Agriculture is a way for farmers and consumers to connect through the weekly delivery of fresh, organic food baskets by the farmer directly to the consumer.

There are 100's of CSA's in Nova Scotia alone. By paying for their produce at the beginning of the season, share holders help provide the farmer with the initial capital to purchase seed and supplies.

By enjoying the CSA we offer you help support your local farmer, help preserve and enrich farmland and reduce our ecological footprint on the earth.

What is a share?

A CSA share with Shani's Farm is a weekly box of Certified Organic produce and herbs as well as fresh home made preserves in season. Shares are available in regular and small shares.

Regular consists of approximately 8-12 items, will feed small family or couple.

Small consists of approximately 5-8 items, will feed individual with a big appetite.

Weekly share runs from end of June to Thanksgiving. Shareholders are also encouraged to read our monthly specials posted on our website www.shanisfarm.com

From our Family to yours!

Our belief is to help promote a better way of life on and around the farm.

By natural growth; for all our livestock, and gardens.
